

HARIPRASAD K

Software Engineer | Full Stack Developer | Java · Spring Boot · React.js · Next.js · Python

+91 6363619355 | hariprasadk716@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Motivated fresher with hands-on internship and project experience across Java Full Stack, MERN Stack, and Python development. Skilled in building web applications with React.js, Next.js, Java, Spring Boot, Hibernate, and Node.js/Express.js, along with Python-based NLP projects using Hugging Face Transformers, BART, T5, and TF-IDF. Eager to contribute to real-world software engineering challenges.

TECHNICAL SKILLS

Languages: Python 3, SQL, TypeScript, Bash/Shell Scripting

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript

Backend: Java, Spring Boot, Spring AI, Hibernate, Node.js, Express.js, REST APIs, OOP, PostgreSQL

NLP & AI: Hugging Face Transformers, BART, T5, TextRank, TF-IDF, Cosine Similarity, spaCy, NLTK

Libraries & Tools: Pandas, NumPy, Flask, Scikit-learn, Git, GitHub, CI/CD, Linux CLI, Docker (Basics), Postman, MySQL, MongoDB

INTERNSHIP EXPERIENCE

Java Full Stack Engineer Intern | Kavora Tech Groups

Jul 2026 – Aug 2026

- Worked on the Nursery Website — building the frontend with React.js and the backend with Java, Spring Boot, Hibernate, MySQL, and REST APIs.
- Worked on the EdTech Website — building the frontend with Next.js and the backend with Java, Spring Boot, Hibernate, MySQL, and REST APIs.
- Worked on RedNode Automations — a portfolio website project built for freelancers, using the same Java, Spring Boot, Hibernate, MySQL, and REST API stack.

Java Full Stack Developer Intern | JSpiders, Basavanagudi

Jan 2026 – Jun 2026

- Built modular Java service components using OOP principles, reducing code redundancy by ~30%; optimized SQL queries with indexing and 3NF normalization for high-throughput data retrieval.
- Worked on a Car Service Management System — handling bookings, service tracking, and billing — using Next.js for the frontend and Java, Spring Boot, Hibernate, and MySQL for the backend.

Full Stack Development Intern | Uniconverge Technologies

Feb 2026 – Apr 2026

- Worked on a Content Management System (CMS) for a blog platform — supporting article creation, editing, categorization, and publishing — with responsive interfaces built using HTML5, CSS3, and JavaScript, cutting page load time by 25%.

MERN Stack Developer Intern | Next Gen Employability Program, Edunet Foundation

Sep 2025 – Nov 2025

- Worked on a Grocery Store e-commerce web app — with product listings, cart, and order management — using the MERN stack (MongoDB, Express.js, React, Node.js), designing 10+ RESTful API endpoints with authentication and integrating MongoDB Atlas for real-time data persistence.

PROJECTS

NLP Kannada Text Summarization — Python · Hugging Face · BART · T5 · TextRank · TF-IDF · NLTK · spaCy

- Built a hybrid extractive + abstractive summarization system for Kannada using BART/T5 Transformers combined with TextRank and TF-IDF for low-resource NLP.
- End-to-end pipeline: data preprocessing → model fine-tuning → performance evaluation across multilingual unstructured text.

ATS Resume Ranker — Python · TF-IDF · Cosine Similarity · spaCy · Scikit-learn

- Automated resume-to-job-description matching using TF-IDF vectorization and cosine similarity, ranking candidates with measurable semantic match scores.

EDUCATION

B.E. Information Science Engineering | APS College of Engineering, Bangalore

2022 – 2026

CGPA: 8.71 / 10.0

CERTIFICATIONS & ACHIEVEMENTS

- Oracle AI Foundations Associate — AI/ML fundamentals, model evaluation, and responsible AI principles.
- Java Full Stack Professional Course Certificate — JSpiders, Basavanagudi.
- Top 7 / 100+ Teams — Hackotsava 2K25 Hackathon: delivered a full-stack solution under a 36-hour constraint, demonstrating rapid prototyping and problem-solving.
